## Documentation

### Edit the logo

Open [index.html](#) file and edit this code:

For the version without menu

```
<div class="logo">
<h1><a href=""><i class="fa fa-power-off"></i> PrimeS</a></h1>
```

For the version with top menu

```
        <a class="navbar-brand" href="#home"><i
class="fa fa-power-off"></i> PrimeS</a>
```

### Changing the backgrounds

The backgrounds are located in "[assets/img/backgrounds](#)". Upload in this folder all the backgrounds you want and then open the "[main.js](#)" file (assets/js/main.js). Change the backgrounds from the code:

```

$('.top-content').backstretch([
    "assets/img/backgrounds/1.jpg"
    , "assets/img/backgrounds/2.jpg"
    , "assets/img/backgrounds/3.jpg"
], {duration: 3000, fade: 800});

```

## Change Images

You can find the images in the "img" folder (assets/img), "team" folder (assets/img/team), "carousel" folder (assets/img/carousel), "icons" folder (assets/img/icons), "testimonials" folder (assets/img/testimonials).  
Replace it with your images.

## Change Colors

All colors CSS are commented in header area of the template. You just need to uncomment. Selected color to make it default.

```

<!--Colors-->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/hotpink.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/orange.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/green.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/seagreen.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/turquoise.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/blue.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/skyblue.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/purple.css"> -->

```

If you want to change color just uncomment a color CSS file like:  
I am going to make my template color blue

Just delete characters marked in red

```
<!--Colors-->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/hotpink.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/orange.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/green.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/seagreen.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/turquoise.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/blue.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/skyblue.css"> -->
<!-- <link rel="stylesheet" type="text/css"
href="assets/css/colors/purple.css"> -->
```

## Change Icon Font

If you want to change icon fonts open the " [index.html](#) " file and edit this code:

For the font awesome icons

```
<div class="icon"><i class="fa fa-example"></i></div>
```

See the font awesome list here:

<http://fontawesome.github.io/Font-Awesome/icons/>

For the elegant line icons

```
<div class="icon"><i class="icon icon-example"></i></div>
```

See the elegant line icons list here:

<http://themebootstrap.net/et-line-font/>

For the ionicons

```
<div class="icon"><i class="icon ion-example"></i></div>
```

See the ionicons list here:

<http://ionicons.com/>

## Setting up the contact form

Open the "[contact.php](#)" file (assets/) and set up the email where you want to receive the messages.

## Setting up the email subscription form

Open the "[subscribe.php](#)" file (assets/). From there you can set up the email where you want to receive the notifications when new users sign up.

You can also set up the message to display on the page when the new users sign up.

## Setting up the email registration form

Open the "[registration.php](#)" file (assets/). From there you can set up the email where you want to receive the notifications when new users subscribe.

You can also set up the message to display on the page when the user subscribes.

## Setting up the social icons

You just have to insert the links of your social media profiles like in the code below ([index.html](#) file):

```
<div class="col-sm-5 social-icon">
<a href="#" class="social-icon"><i class="fa fa-
facebook"></i></a>
<a href="#" class="social-icon"><i class="fa fa-twitter"></i></a>
<a href="#" class="social-icon"><i class="fa fa-
linkedin"></i></a>
<a href="#" class="social-icon"><i class="fa fa-tumblr"></i></a>
<a href="#" class="social-icon"><i class="fa fa-
instagram"></i></a>
```

```
<a href="#" class="social-icon"><i class="fa fa-  
pinterest"></i></a>  
</div>
```

## Other settings

The plugins used in this template come with other settings. If you want to use these settings or you need other documentation, you can find all the plugins' homepage links in the "[credits.txt](#)" file.
